

SECUREX®

THE ORIGINAL, TWO-PIECE WHEEL NUT FOR HUB PILOTED WHEELS

Tramec Sloan offers the industry's best wheel nuts: the original Securex® by MacLean-Fogg Component Solutions. **With 3 to 5 times more clamping force** than conventional ball-seat fasteners, Securex® means **longer wheel life, reduced maintenance, and greater safety.**

The nut body on each Securex® wheel nut is made of through-hardened carbon steel and each free spinning washer is made of through-hardened and tempered chrome-moly steel. This design generates a bearing-type action which allows more of the torque to be transmitted into clamping force. At the same time, this bearing action offers a more precise torque-to-clamp force relationship, allowing the entire fastening system to be used at the optimum end of the load range.

FEATURES & BENEFITS

- Name Forged into the Washer Assures Product Integrity
- Heat Lot Traceability Code on Every Fastener
- PTFE Coating Reduces Friction & Enhances Corrosion Protection
- Meets SAE J1965 Requirement for Torque Tension
- Made in the USA!

P/N	THREAD	DESCRIPTION
MF110343	M22 x 1.5	33mm Flangette Hex (31mm High), Flat Washer
MF111026	M22 x 1.5	33mm Hex, Flat Washer
MF137182	M22 x 1.5	33mm Flangette Hex, Flat Washer
